

Energy Meter HAN

Read detailed information about the real time energy consumption for your home.

When the energy meter reader (HAN-reader) is connected to your smart home system (requires a smart home hub or smart router), you can set up rules so that other connected devices are automatically switched off when the total consumption of your home is high. This way you can easily reduce your electricity bill and avoid power peaks that can lead to higher grid rents. Controlled and monitored via the smart home app.
